MPL Project - NestQuest

Problem Statement

Finding the right property to rent or buy can be challenging & time consuming due to lack of structured, user-centric solutions. The need for a platform that streamlines property searches while catering to diverse user requirements is evident.

Nesto

Description

NestQuest is a comprehensive real st estate mobile application developed using Flutter. It provides a seamless experience for property seekers by simplifying property search, listing & communication. The app delivers a user-friendly platform for viewing properties, connecting with agents, & managing properties, ~~connecting with agents &~~ man related information.
